The company boasts a paramount experience ranging 4 decades and more, with thorough knowledge and firm foothold in the market space.

Acclaimed for its quality products and optimum manufacturing standards, the company flaunts a meticulous skill force that masters the use of ideal and apt materials to bring about cutting-edge products, as per individual client requirements.

Efficacy, efficiency and accountability are the hallmarks of success that has led the company to attain unprecedented heights of growth, gained remarkable credibility and earned abundant fame in its years of operations so far.

Incepted in 1981, the company has gained an eminent ground Pan India, establishing a clientele that spans from small time fresh start ups to the reputed industries which include and prestigious ISO 9000 companies, multinational companies, export oriented units, manufacturers and exporters of machines and equipment with CE Certification, Dept. of Space and Defense Organizations; the reach is vast and multifarious in outlook and extent.

At AGS, Quality comes with no compromise and Timely Delivery is taken into due consideration at all times. All AGS products carry 100% Money Back Guarantee.

AGS has proved its mettle time and again, thus, creating a prominent space for itself, with a notch above the rest.

Product Portfolio

We manufacture an exemplary range of High performance Safety Signs as per international standards for machines and electrical equipment; wide range of machine labels using different materials like Vinyl, Polyester, Polycarbonate, Stainless Steel, Gravoply etc., with excellent printing quality, scuff resistance, adhesive property and durability.

High Accuracy Scale Rulers

AGS also offers standard design high accuracy Scale Rulers with length up to 42"/1065mm and custom design dials and gauges, duly calibrated. Besides, we also facilitate custom design scales with commendable accuracy up to a length of 100 meters.

Other Products

We are also in the production of Workplace Safety Signs, Floor Safety Signs, Glow in Dark Signs, Name Plates for Machines, Rating Plates for Electronic Instruments, Mimic Diagram, Legend Plates, Tamper Evident Seal, Tamper-Proof Seal, Diameter Measuring Scales, DTP Scales and Printers' PICA Scale.

SAFETY DECALS

Safety Decals are designed to warn of hazards, indicate mandatory actions or safety procedures, prohibits actions or objects that may be dangerous, identifies the location of firefighting or safety equipment, marking of exit routes, signage boards depicting locations and various pointers implying the parameters to follow, instructions of particular industrial machine usage and so on and so forth.

AGS is an innovative and customer driven company since 1981, into the business of manufacturing an extensive range of industrial labels catering customized requirements to vast clientele.

Our extensive products include High Performance Safety Decals for Machines and Equipment, Brand Labels, Machine Nameplates, Arrows and Lubrication Point Stickers and Control Panel Labels. Our products have gained much appreciation and are in high demand amid leading industrial units across India.

Our strict adherence in every stage of the production process, from procuring the best raw materials to maintaining vigilance as per

international standards while manufacturing, we ensure stringent quality control measures to attain optimum results and absolute client satisfaction.

We offer a wide range of decals for machines and electrical equipment in a variety of formats and messaging options. Through our products, our clients meet the safety compliances by pasting these decals at appropriate places on the machine to effectively communicate the hazards. In effect, it avoids the risk of accidents and protects people from injuries, thereby creating a safe working environment and minimizing liabilities.

We also facilitate specialized signage, including ones in foreign languages of your choice. We cater to the demands using variety of materials like Vinyl, Polyester, Polycarbonate, Gravoply and SS-304, in local or foreign languages.

Customization has won us much appreciation and we are well-equipped to meet the demands of our huge clientele with utmost satisfaction.

SAFETY DECALS FOR MACHINES

There are various hazards involved with the use of different machines, ranging from small bruises to severe injuries, sometimes in an unfortunate event, it could prove fatal as well. It is very important to caution the operator of level of risk while working at the machine. AGS covers Safety Decals for almost all types of machinery. You can choose from the range readily available with us or we can custom print, as per your requirement, pertaining to indoor or outdoor use.

SAFETY DECALS FOR ELECTRICALS

Electricity is a hazardous form of energy. It is extremely crucial to manage the well-being of the workers as well as overall safety of the workplace environment. One cannot get an inkling of what is in the coming as we cannot see, hear or smell Electricity. But the disaster that it is capable of accruing are far-reaching in effect. From burns, muscular tissue damage, falling injuries, injury due to arc flash or cardiac arrest, the damage can be of variant intensities and fearful indeed. AGS Safety Decals cover signs to caution the operator of the risks that the equipment ensue. There is a vast range of products readily available or we can design and print as per your requirements.

BILINGUAL MULTI-LINGUAL SAFETY DECALS

In the present day, foreign workers are commonplace in many industries and English is a second language for many. In such cases, the onus is on employers to provide bilingual signs, especially for those workers who are more comfortable reading the language other than English. AGS can print Safety Decals in any foreign language or in bilingual format. Let us know the Cat. No., of the safety decals, the language, single or bilingual, as preferred, we will facilitate the requirements accordingly.

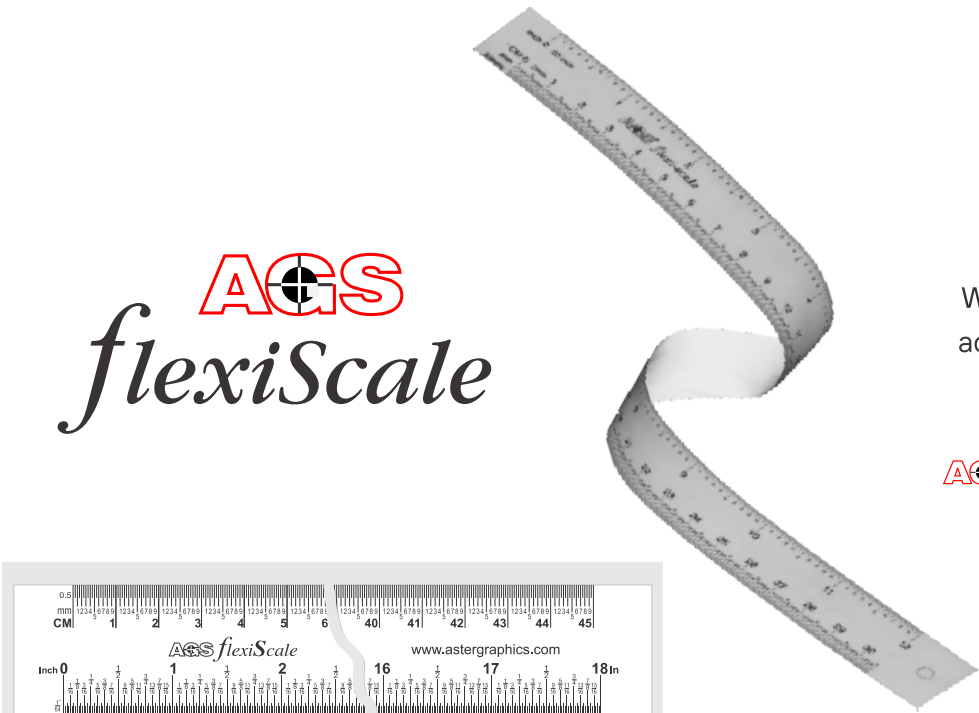

LUBRICATION POINT STICKERS

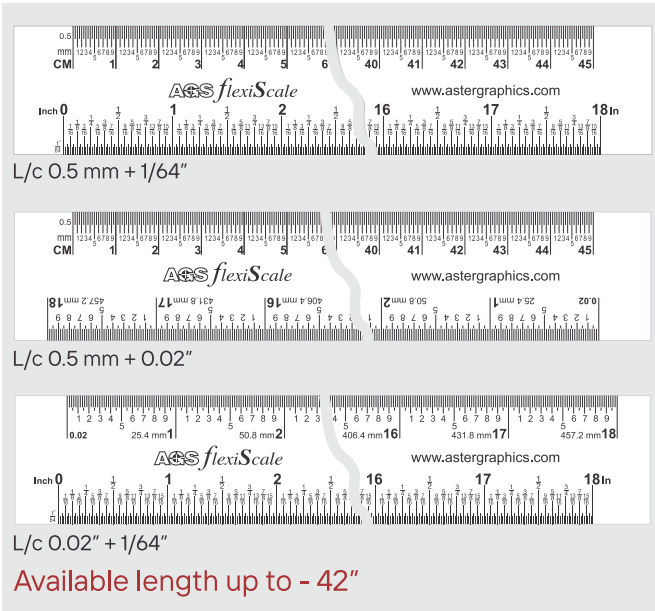

Machine failures due to faulty or inappropriate lubrication can be effectively prevented by giving appropriate attention. To address this, AGS has introduced a wide range of Lubrication Point Decals in high performance material. Once pasted on the machine, the decal will stay there for years.

High Accuracy Flexible
SCALES

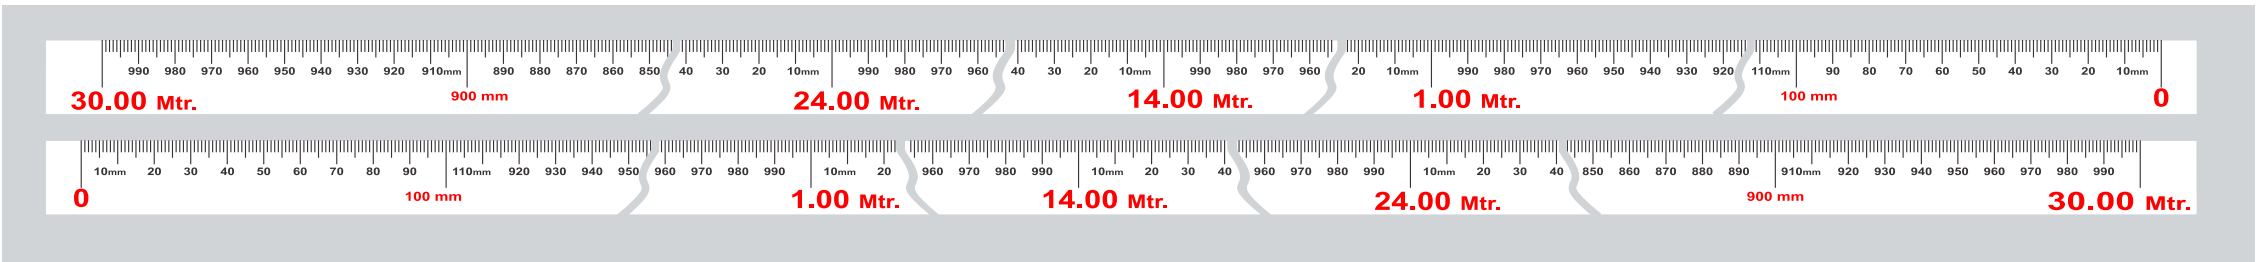

When it comes to taking accurate measurements on flat, curved or irregular surface **AGS flexiScale** is the right choice.

High Accuracy FlexibleSCALES
Made from dimensionally stable and virtually tear-proof Polyester laminate material. The scale markings are scratch proof, wash proof and fade resistant. Extremely durable. Thin gauge, flexible and accurate makes it ideal for fine detail measurements on any flat, curved or irregular surface.

Accuracy Calibrated by NABL
accredited Laboratory $\pm 0.01\%$.

Accurate Scales with **3M** adhesive back

Standard scale
Center Zero Scale
Custom design scale

Flexible and Accurate Polyester laminate Scale with **3M** High Performance Adhesive for directly pasting on the machines. Marking are scratch proof, wash proof and fade resistant. Permanently sticks on the machine

Accurate Scales in SS 304 material
AGS offers wide range of Accurate standard and custom design Scales in SS 304 material with / without **3M** High Performance Adhesive for directly pasting on the machines.
Marking are scratch, wash and fade resistant.
Scale will stick Permanently on the machine
Accuracy Calibrated by NABL
accredited Laboratory $\pm 0.01\%$.

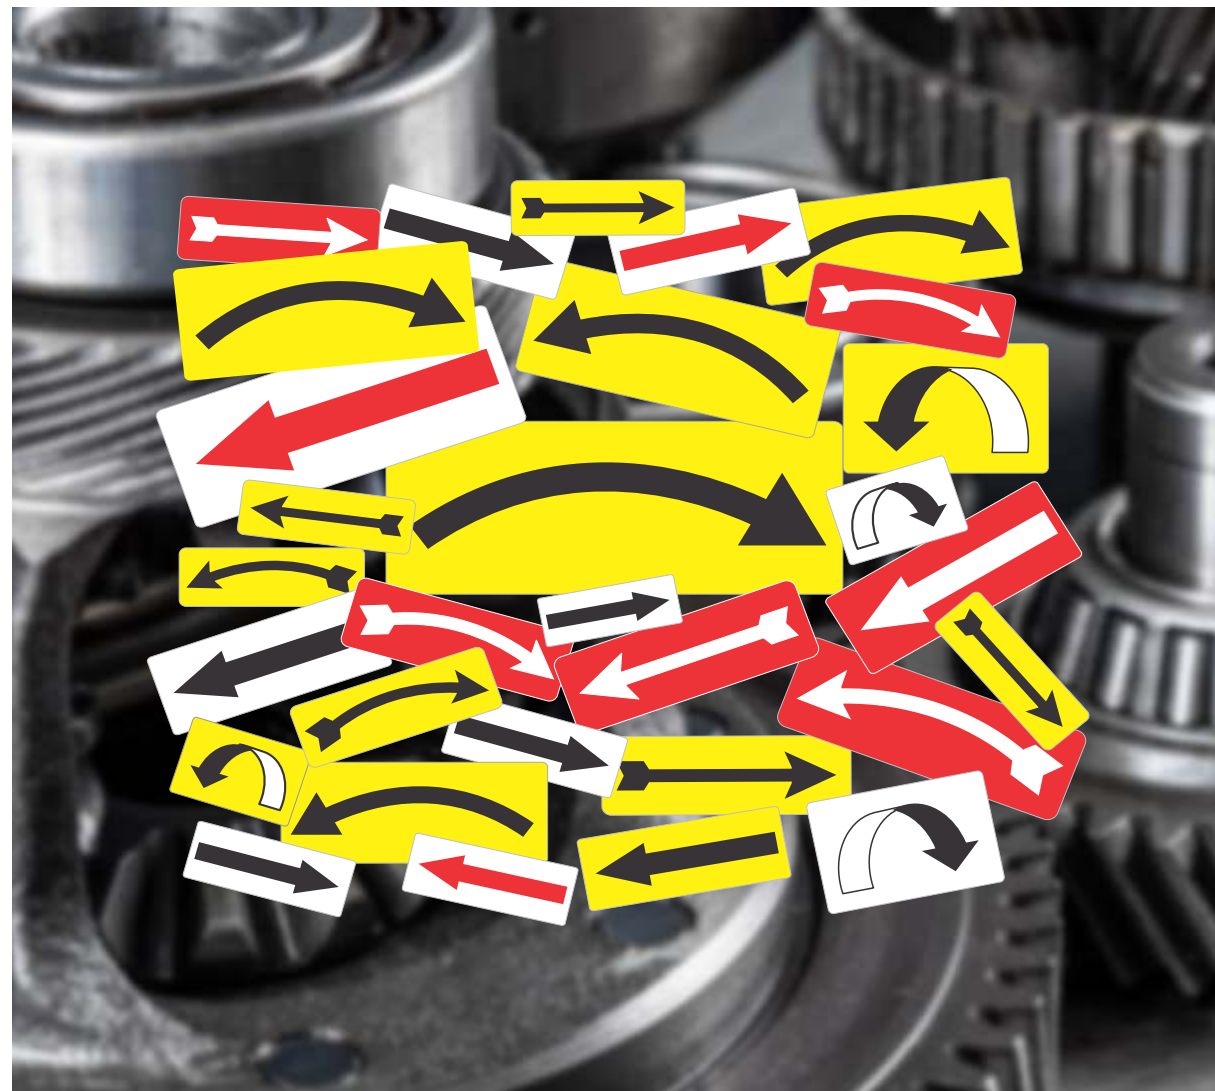

Custom design scales
30 to 0 Mtrs Right to Left reading &
0 to 30 Mtrs Left to Right reading.

Accuracy Calibrated by NABL

Specially made for

ARROW LABELS

Direction Arrow stickers also play an equally important role to make your machine more user friendly. These high performance labels and Decals are made from selected grade of industrial plastics. Available in wide range, size and colors, Printing will not be affected by grease, oil or other lubricants. They can be easily cleaned using soap water, petrol or isopropyl alcohol. These labels exhibit excellent material and print quality, adhesive property and durability.

HAZARD MARKING TAPES

Yellow Black Hazard marking tapes pasted on machines at appropriate position can play a critical role to communicate hazard warning, promote safety and prevent injuries. It helps keep workers safe. AGS High Performance tapes are available in width ranging from 12 mm to 150 mm. Excellent material quality, the printing is wash proof, fade proof and scratch resistant. With highly aggressive adhesive property, it will stay firm on the machine for lifetime.

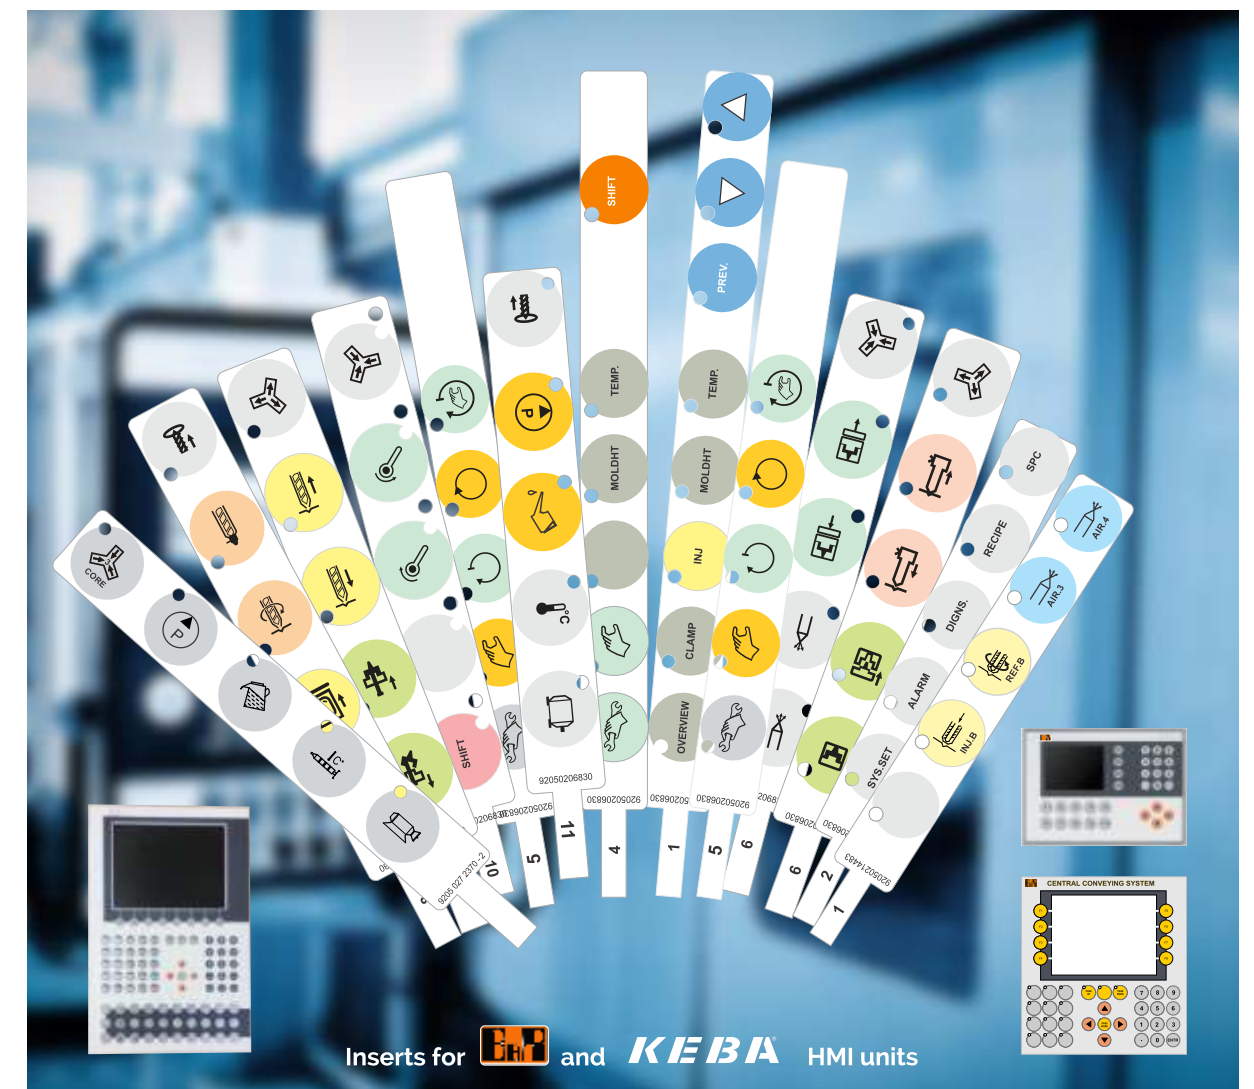

HIGH PERFORMANCE BRAND LABELS

Unique Dura-Sign Brand labels. These high performance Brand labels are made from special grade industrial plastic film with very aggressive adhesive. Unlike in other Vinyl cut labels, the colors are scratch proof, wash proof, fade resistant and durable. It withstands temperatures up to 110oC. It won't peel off, and will stay firm on the machine lifelong.

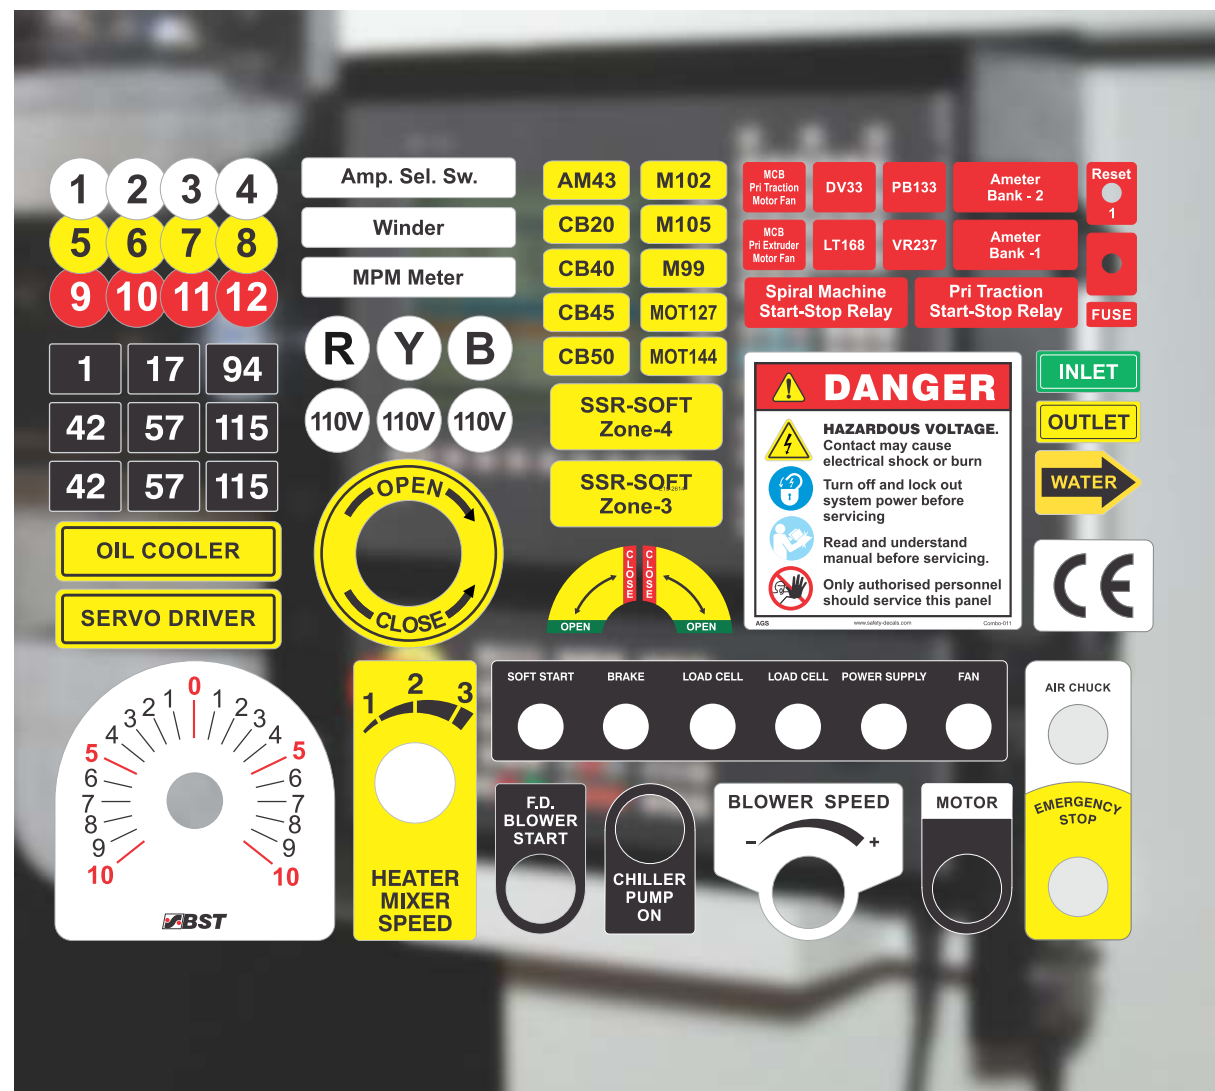

INSERTS FOR B&R & KEBA HMI UNITS

Legend symbol inserts for **B&R** and **KEBA** HMI units. Made from Polyester laminate as per customer's design, these inserts exhibit excellent print quality, accuracy and durability. These strips are being used with many Plastic processing and other machines equipped with **B&R** and **KEBA** HMI units.

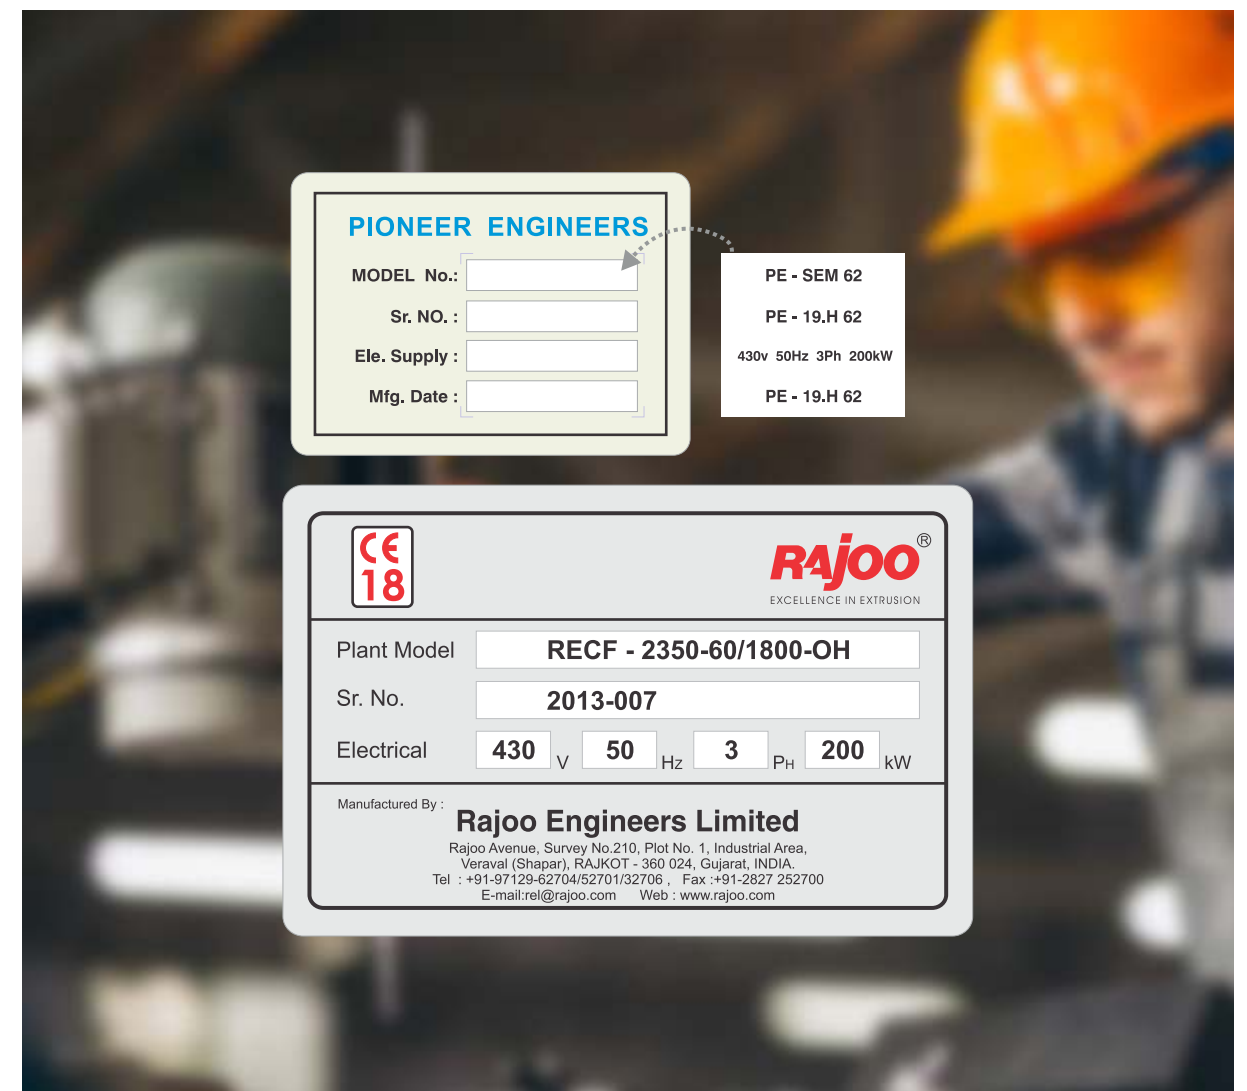

CONTROL PANEL ACCESSORIES

Custom design High Performance Labels made from industrial grade plastic film, these labels flaunt excellent material, printing quality, adhesive property and durability. AGS offers end-to-end solutions for control panel label requirements. Excellent material and Printing Quality, Adhesive property and Durability. AGS Offers Total solution for control panel label requirements

VARIABLE DATA
MACHINE LABELS

Gone are the days when the only option was engraving or metal stamping. Now we can print your variable data nameplates on High Performance translucent Polycarbonate film with highly aggressive adhesive. Data is printed on regular office stationery paper as per label format, cut in appropriate size and pasted on the back side of Legend Plate. The Legend Plate is then finally pasted on the machine and its done. Time consuming riveting process is eliminated and it looks more attractive too. Highly durable and user friendly, excellent print quality, fade resistant, wash proof and scratch proof, it's available in variety of colors as per customer's choice.
